ABOUT

Senior Fullstack Developer with experience in both Backend and Frontend skills as well as mentoring and leading one or 2 people in several projects. I have expertise in developing and providing maintenance on enterprise systems with extensive experience in the back end.

Strong experience in Java Core and Java Web Application development, including AWS Microservices as well as Angular4+ & ReactJS with Redux. I possess several soft skills essential to leading development teams. I can work under pressure and have the ability to adapt quickly to any new technologies and all kinds of projects.
