EXPERIENCE

SENIOR SOFTWARE ENGINEER

FTV Labs (2018 - present)

Working in a startup project that empowers field service organizations with intuitive and enterprise grade technologies to scale profitably.

- Responsible for developing some backend microservices and core functions in the system using latest technologies such as Spring Boot 2, Postgresql, Microservices with Dockers and Kubernetes, GRPC, Pulsar.

TEAM LEADER - PROGRESSIONAL SOFTWARE ENGINEER

Adnovum Vietnam (2014 - 2018)

Most of the time I worked for the TWINT project, a digital wallet and mobile payment solution for Swiss market.

- Responsible for building two websites for admin back office users and partners to manage all the data in the projects using AngularJs.
- Implementing APIs to handle the business logic for mobile applications (Android app and ios app). Supported deployment, Involved some operations tasks: writing Ansible script to automate the deployment process.
- Mentored newcomers in the project and later became the leader of the team.

Technologies: Java-EE, Wildfly, Oracle, AngularJs, Ansible.

JUNIOR SOFTWARE ENGINEER

Axon Active Vietnam (2012 - 2014)

Being a part of a SCRUM team with other freshers and with a new fresh project, in here I started to learn the real software development process as well as using many technologies and tools such as: Groovy/Grails Framework, Java-EE, JQuery, Bootstrap, PostgreSql, Maven, Jenkins, Glassfish.

SKILLS

- Solid knowledge of Java, java-EE, Spring/Spring Boot 2, JUnit, Restful API.
- Experience with microservices architecture, kubernetes, docker, protocol buffers / grpc, pulsar message queue.
- Experience with devops, jenkins, ansible.
- Experience working with postgresql, oracle database.
- Familiar with Unix-like environments, Git code versioning tool.
- Experience working with web technologies: HTML, CSS/Bootstrap, AngularJs.
- Familiar with build tools such as Ant, Maven, Gradle.
